Precipitation probability							
30%	50%	80%	90%	60%	70%	60%	30%

Forecast for Saturday 07 Aug 2021

Weather: Cloudy with scattered showers first thing, before a band of rain soon moves across the park through the morning, and could be heavy at times. This band will move off, leaving an afternoon of scattered showers, which may also be heavy as well as thundery. These showers will continue into the evening and night, blending together to form longer spells of rain at times.

Chance of cloud free mountain/hill tops above 600m: Near 0% in the morning, improving to 40% in the afternoon.

Visibility: Very poor as the rain band passes through the morning, with cloud obscuring tops above 400m and heavy rain. Improving to give some good views between any showers, but quickly falling to poor at times during any heavy rain. Further spells of cloud on hills above 500m likely through the day, especially as showers move through.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Continued wet conditions through the day will make walking conditions difficult underfoot – appropriate footwear and waterproofs should be worn. Thunderstorms bring the risk of lightning, and walkers should be prepared to change route at short notice.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Fri 06 Aug 2021	12.6mm	17.2mm	17.2mm

Forecast for Sunday 08 Aug 2021

Weather: Bands of rain and showers, heavy at times, moving across the park through the morning. Showers becoming more scattered in the afternoon and evening with a greater chance of some sunny intervals in between. The isolated shower still potentially heavy and thundery.

Maximum wind: Winds on the summits initially westerly 35mph, gusting 45 mph. Transitioning by the evening to southwesterly 20mph, gusting 30mph.

Chance of cloud free mountain/hill tops above 600m: 10% through the morning, rising to 60% in the afternoon.

Visibility: Poor visibility through the morning with rain and drizzle; cloud bases falling to 400-500m and obscuring most summits. Visibility improving in the afternoon between the showers, but still becoming poor in any precipitation (particularly if heavy). Cloud bases predominantly rising in the afternoon to 900m, but still with temporary drops to 700m.

Temperature: **Valleys:** Plus 13 Celsius, rising to plus 18 Celsius.
At 600m: Plus 8 Celsius, rising to plus 10 Celsius.
Freezing level: Above the summits.
